

REACH&RoHS COMPLIANCE AND STATUS

Ramco Europe has reviewed the European Union REACH (Registration, Evaluation, Authorization, and restriction of Chemicals) regulation, the Automotive Industry Guideline, and the European Chemicals Agency (ECHA) Guidance. It is our belief that Ramco is not especially subject to, or targeted by, the REACH regulation.

Ramco does not expect to register under REACH:

- Ramco is an importer, fabricator and distributor of “*Articles*” as defined by Article 3(3) of REACH;
- There is no *Substance* in these *Articles* which “*is intended to be released under normal or reasonably foreseeable conditions of use*” as required by Article 7(1)(b) of REACH;
- In the normal or foreseeable course of business Ramco does not traffic in *Substances* or *Preparations* (both are definitions under REACH).

Consideration was given to lubricants, rust preventatives and thread treatments for possible registration as *Preparations*, but the amounts are negligible per yearly weight allowances under REACH.

Besides, products supplied by Ramco Europe do not contain lead, mercury, cadmium, hexavalent chromium and their compounds, PBB, PBDE, DEHP, BBT, DBT, BIBP in concentration exceeding the limits set by the directives 2011/65/EU (RoHS 2) and 2015/863/EU (RoHS 3).

This declaration is based on our current knowledge and will be modified if we'll receive further updates.

In the certainty of having clarified our current position and having fully responded to the obligations of REACH/RoHS regulations, we remain available for any clarification.

Sincerely,

Gavardo, 15/06/2020
